Remove the jumper while the machine is OFF and place onto pins 1 and 2 Power on your machine for a minute.. Please let me know if you have any further questions or concerns Posted on May 05, 2010.. • 1 Answer SOURCE: Compal manufactured this computer and it was sold under many different manufacturers names.. (Note: Your system will not POST) Shutdown your machine and put the jumper back to pins 2 and 3.. Remove cover from memory, roughly in centre of base, and you will see a screw that secures the drive.. Remove the screw and the drive will slide out Remove the bracket on rear of drive, attach to new drive and reverse above procedure.. Remove this battery along with the power cable from the power supply Hold down the power button to fully discharge the system.. Here you can update Nvidia drivers and other drivers Geforce gtx 550 ti update drivers for mac. 773a7aa168 [Autocad Download For Mac](#)
